

LEAF SAP SAMPLING GUIDE

Pistachio

Keep in mind!

- Sample both young and old leaves from the same tree. Decide if both male and female trees are to be sampled or just female.
- Avoid outer rows and first 20 feet of a row.
- Sample leaves with average leaf quality. Sample areas of abnormal growth separately.
- Sample consistently; sunny side of tree, avoid extreme weather etc.
- If leaves are wet at sampling lightly pat dry before shipping (moisture influences results).
- Sap Analysis data works best when used in progression. The more samples the better crop nutrient uptake can be illustrated and understood.
- Sample either before or 3+ days after fertilizer/pesticides have been applied.

Sampling Instructions

Sample Time: Sample in the morning before 11 a.m. and temperatures less than 80 °F for adequate leaf tension and moisture. Avoid sampling in the rain. Store samples in cooler.

Sample Size: Collect 90+ grams each of both new (young) and old compound leaves + petiole for a collected total of 180+ grams per sample set. Bag compound leaves separately in gallon zip lock bags labeled New and Old.

Initial Sampling: Begin sampling when young leaves are fully expanded and developed. Collect NEW fully developed leaves only. Place stacked compound leaves + petiole in zip lock bag labeled NEW.

Sequential Samples: New & Old compound leaf set every 2+ weeks (from 1st new flush to peak harvest).

NEW- Youngest fully expanded compound leaves + petiole from the growing point of the plant. Place stacked compound leaves + petiole in zip lock bag labeled NEW.

New leaf = newest yet fully developed compound leaf

OLD- Oldest still healthy and functional compound leaves + petiole furthest from the growing point. Place stacked compound leaves + petiole in separate zip lock bag labeled OLD.

Old leaf = oldest yet still viable compound leaf

****Do not mix varieties when sampling as this may cause variation in analyses****

OLD Leaf Sample

Keep samples cool. Ship overnight or 2-day on M/T/W (morning arrival time) with ice packs. Samples should not come into direct contact with ice packs. Let air out of bags before shipping.

All samples must be accompanied by a fully completed Sample Submission Form. Fillable version available on our website www.newagelaboratories.com.
